# Need to know what other team members are doing?

Where are they? What are they doing?

No problem with TeamAgenda.

TeamAgenda allows your people to indicate if the activity was completed successfully, the actual time taken, if it was cancelled, who attended, etc.

Using TeamAgenda you can be authorized to see all your team's activities, their status, etc.

You can easily tell if your people are available, where they are, what they are doing.
