

Teamsoft : Version Number

Additional Information

Introduction

Teamsoft Technical Support may ask you to provide the version number of TeamAgenda Server and TeamAgenda. This document describes how to get the version number of TeamAgenda Server and TeamAgenda.

How to figure out which release of TeamAgenda Server I am using?

Method 1 :

Start your favorite browser and go to the following URL :

<http://127.0.0.1:32423>

If you are not on your server, please replace 127.0.0.1 by the address of your TeamAgenda Server. The version number is shown at the bottom of the web page.

Method 2 :

On Mac, start a terminal session and type:
`sudo stsd version`

On Windows, start a dos session and type:
`stsd version`

The version number on TeamAgenda Server will be show in the window.

How to figure out which release of TeamAgenda I am using ?

On Mac, start TeamAgenda and go to TeamAgenda and "About TeamAgenda". A window will appear. The version number is shown on the top right of the window.

On Window, start TeamAgenda and go to Help and "About TeamAgenda". A window will appear. The version number is shown on the top right of the window.
